[33220] xvi, 400pp + 9 coloured maps on fold-outs and including many b & w photographs. *Gilt lettered white buckram, cloth spine*. 34x22 Lacks 3 illustrations of European traffic systems (they don't appear to have ever been bound into this particular copy). "Unprecedented in scale and scope, in detail and significance [this Report] stands as the first systematic attempt to translate European planning ideas into a colonial context." (R. Harris and R. Lewis, 2014). With its detailed descriptions, many maps, plans and rare photographs, it provides a unique vision of a major colonial city at the beginning of the 20th century. The photos are especially interesting and the Report has detailed proposals for improvements to the city. Richards was an English engineer, who became interested in town planning (he was an early member of the Town Planning Institute). His work in Calcutta involved much field study and original research. A rare and important work that deserves to be better known.

A scarce coalfield area plan

9. **Chesterfield. ADSHEAD S. D. *The Chesterfield Regional Planning Scheme. The Report Prepared for the Joint Committee by..***

The plan includes sections on industries & docks, population & health, communications (including roads, trams & railways), open spaces etc. Perhaps reflecting the pioneering approach of the Dublin Plan, there is also some discussion of regional considerations. Hamburg, Johann Trautmann, 1945. [21983] 34pp. *Pamphlet. 21x15.* Covers professionally repaired, with new end-papers, to make a good copy. **£35.00**

Text of a lecture, discussing the rebuilding of Hamburg, given by Schumacher in the Rathaus, on 10 October, 1945, close to the end of his life. The city lay in ruins. Rare.

15. **Hankow. ROWE William T Hankow. Conflict and Community in a Chinese City, 1796-1895.**

Stanford, Stanford UP, 1989. [16510] xv, 440pp, 4 maps, 4 figs, 10 tables, bibliography. *Cloth, 24x16.* Fine, dust wrapper (this a little rubbed). **£20.00**

Hannover had taken a pounding in the war and the centre needed a huge amount of rebuilding. Extremely interesting reconstruction plan. There is a great deal on new streets and traffic, housing, residential areas etc. Gutschow was a German planner who had worked in Hamburg under Schumacher and through the Nazi period. A fine reconstruction item with excellent plans and illustrations.

17. **Helsinki. SAARINEN Eliel Munksnäs-Haga och Stor-Helsingfors. Stadsplansstudier och Förslag.**

Helsingfors, 1915. [32857] viii, 164pp including illustrations plus 10 folding, coloured town plans and maps. *Card covers, with paste-on picture. 32x25.* Spine professionally repaired to make a near fine copy. **£30.00**

Saarinen's famous scheme for Munksnäs-Haga - in essence a plan to extend Helsinki by means of a satellite town. This was Saarinen's most ambitious town planning project. As well as a carefully drawn plan, it contains a very detailed study of townscape features, with birds-eye view and models and designs for a variety of buildings. Unfortunately, changes in the economy meant only small parts were actually built. A beautiful plan. Scarce. [Swedish text].

18. **Köln. SCHMITT Dr.Hans Der Neuaufbau der Stadt Köln.**

Köln, Balduin Pick Verlag, 1946. [33234] 211pp. *Wraps.* Two small ancient owner stamps, a good copy. **£45.00**

London, SAVE, 1986. [32845] 44 single-sided sheets inc illustrations. *Spiral-bound wraps, 30x23.* Final spiral slightly detached, ex English Heritage library, very good thus. **£25.00**

Leeds, a great Victorian city, had been neglected since WW2, with much of the new development being mediocre. Many fine buildings had been lost as a result of redevelopment. Important study of the city.

A pioneering traffic plan

1964. [24695] x, 113pp incl illustrations, maps, plans, graphs etc. *Spiral-bound laminated card*, 30x23. Very good copy. **£30.00**

Smigielski's Leicester plan was the most advanced traffic plan for any British city up to this date.. Unfortunately, very little is said about public transport, although the author seems to be acutely sensitive to the pressures being put on the city by cars.

22. **Letchworth. FIRST GARDEN CITY LTD Letchworth. The Well-planned Beautiful Town. Where Town and Country Meet [cover title]**

Letchworth, 1935. [33200] End papers maps, 121pp incl illustrations, interesting adverts. (Cover states 128 pages but this is incorrect). *Pictorial wraps*. 21x16. A nice copy. **£25.00**

Short history of the founding of Letchworth and good general overview, with nice photos.

Towards solving London's traffic – the 1937 Survey

23. **London. BRESSEY Sir Charles & LUTYENS Sir Edwin Highway Development Survey 1937 (Greater London)**

London, HMSO, 1938. [24685] iv, 68pp, incl 6 plates of diagrams + 2 large folding road plan maps in rear pocket. *Cloth*. 33x22. Top and bottom of spine a trifle pulled, else very good bright copy. **£85.00**

The Bresse Lutyens Report. A scarce and informative item, issued by the Ministry of Transport. A late '30s attempt to solve the eternal problems of London traffic. Bresse, who carried out most of the work, was a well-known traffic engineer. Little attention is paid to mass transit solutions, although some ideas for roads over railways, are presented. Motorways are already being mooted.

24. **London - City. CORPORATION OF LONDON Report. Improvements and Town Planning Committeeon the Preliminary Draft Proposals for Post-War Reconstruction in the City of London.**

London, B.T. Batsford for the Corporation, 1944. [30704] Frontis map, vi, 32pp, xxxiv + many fold-out coloured maps and plans. *Gilt lettered two-coloured cloth*. 34x22. Foxing to cover and end papers otherwise unusually good copy. **£30.00**

Major work, massive in scope and fascinating in detail.

The first Reconstruction Plan?

28. **Lübeck. PIEPER Hans (Städtbaudirektor), PIEPER Klaus (Bearbeiter und Hsgb) Lübeck - Städtebauliche Studien zum Wiederaufbau einer historischen deutschen Stadt.**

Hamburg, Br. Sachse Verlag, 1946 [33238] 160pp, 123 illustrations (with many plans, maps, elevations etc), aerial photo of bomb damage. *Wraps with plain covers*. 30x21 Spine rubbed, back of (plain?) dustwrapper still present. Contents very good. Fair copy of a fragile item. **£85.00**

Lübeck was one of the first German cities to suffer huge destruction by air attack (March, 1942) and the present work is also one of the "earliest fully developed reconstruction plans for postwar Germany" (J. M. Diefendorfer, 'In the Wake of War'). Hans Pieper had been chief planner of Lübeck during the Nazi era and stayed in post at the War's end. He died in the summer of 1946, however. His son, Klaus Pieper, who also served in the city's administration, published his plan. The plan mainly rejects restoration principles in favour of wider streets, out-of-scale new housing blocks and commercial buildings. It created a storm of criticism. A very scarce and interesting work.

29. **Marseilles. GREBER Jacques and PROST Henri (preface) Ville de Marseilles. Plan d'Aménagement et d'Extension.**

Paris, Vincent, Fréal (Bibliothèque de l'Institut d'Urbanisme de l'Université de Paris), 1933. [32856] Frontis, xiv, 118pp plus 104 plates, double-page coloured Extension Plan. INSCRIBED by Greber to a French high-ranking government official. *Modern cloth binding with original publisher's wraps bound in*, 28x23. A very good copy. **£495.00**

One of the most important inter-war European city plans and very scarce. Gréber was a notable French architecte-urbaniste at the Paris Institut d'Urbanisme. His plan pays considerable attention to traffic circulation, including mass transit aspects, civic design, restoration of historic districts, open spaces and other features. There would be major extensions to the urban area, incorporating grand new axial boulevards with open spaces at intersections.

New Ash Green – a new settlement comprehensibly planned

30. **New Ash Green. SIMMS Barbara (ed) Eric Lyons & Span**

London, RIBA, 2006. [31955] Pictorial end papers, frontis, xv, 240pp incl numerous photos, many in colour. *Boards*, 24x23. Fine copy. Original edition. **£150.00**

An extremely valuable document for this model village in south London's outer suburbs, designed by Eric Lyons of Span. It had been officially opened in 1967 and was at the time a unique self-contained new settlement. Highly detailed, with information on the historical context, the village plan, social life etc..

32. New York. BARTLETT John R and ASSOCIATES *Outline of Plans (with illustrations) for Furnishing An Abundant Supply of Water to The City of New York, from a Source Independent of the Croton Water-Shed, Delivered into the Lower Part of the City Under Pressure Sufficient for Domestic, Sanitary, Commercial and Manufacturing Purposes Welwyn Garden City Expands, and for The Extinguishment of Fires, With Legal and Engineering and Other Papers.*

J R Bartlett compliments slip, and addendum slip between pages 66 and 67. *Cloth. 30x24.* Very nice copy. Owner's signature on end paper. **£250.00**

A outstanding New York item. New York and Brooklyn urgently needed a new supply of water in addition to that from the Croton Water-Shed. The report proposes a new supply from the Passiac Water-Shed, west of the Hudson, mainly in New Jersey. The waters would be brought by pipes or aqueduct to the Jersey City shore and thence through a tunnel to the lower part of the City of New York. The tunnel would be a great feat of engineering and there are some splendid artist's views and cross-sections in the report. A beautifully produced plan, with exceptionally fine illustrations.

Oxford Group for Transport Planning Reform, 1971. [33135] iv, 46 pp inc 9 maps. *Wraps, 29x21.* Very good copy. Peter Hall's stamp inside front cover. **£25.00**

Plea for a more European approach to transport in Oxford, with more public transport, consideration for pedestrians, cyclists etc. An enlightened early 1970s study, much of which appears to have been adopted latterly. The car should no longer be king in the town.

34. Oxford. HAVINDEN Michael, CLARK Genefer et al (editors) *Visions for Oxford in the 21st century.*

Oxford, Oxford Civic Society, 2003. [33074] viii, 150pp, many illustrations (photos, plans etc) *Pictorial wraps. 25x20.* Fine copy, as new. **£15.00**

De Soissons was appointed consultant town planner to the scheme. Welwyn was developed as a New Town jointly with Hatfield.

SCARCE CONTEMPORARY ACCOUNTS

38. ADVISORY COMMITTEE ON RURAL COTTAGES *Report of the Committee Appointed by the President of the Board of Agriculture and Fisheries to consider and advise the Board on Plans, Models, Specifictions, and Methods of Construction for Rural Cottages and Outbuildings with Appendices and Reduced Plans.*

London, HMSO, (1915), 1918 reprint. [32543] 96pp inc very many plans, elevations, photos. *Card, 24x15.* Professionally rebacked, with new covers, paste-on label

and end papers; browning to cover of report. Generally a good firm copy of what was a fragile item. **£50.00**

The Committee were Christopher Turnor, Cecil Harmsworth, MP, Raymond Unwin and Lawrence Weaver. An important report. Cottages are in the Garden City style. Some of the designs are taken from the 'Country Life' National Competition for Cottage Designs, the jury for which included Walter Brierley, Robert Lorimer and G L Pepler. The condition of most rural cottages at this time was regarded as sub-standard, and these better designs were influential in improving standards.

98. **TAUT Bruno** *Die Stadtkrone mit Beiträgen von Paul Scheerbar, Erich Baron, Adolf Behne.*

Jena, Eugen Diederichs, 1919. [30847] 143pp, 72 illustrations (drawings, photos, some tipped-in). *Patterned boards. 25x19.* Spine label scuffed, some light staining to top of cover and tiny scuff; generally a good copy of a fragile item.

£190.00

A rare and beautiful Taut item on city design, published the same year as his "Alpine Architektur". Scheerbar posthumously contributes "Das neue Leben: architektonische Apokalypse" and a poem, "Der tote Palast". One of the several German utopian architecture books that followed the Great War. But in the present work, Taut is also more practical; eg he has plans of New York, Canberra, Vienna etc. One of Taut's finest works and historically significant.
